

SIDEBOARDS – NSV’s spring novelty of 2024

At the Nuremberg Toy Fair, Nürnberger-Spielkarten-Verlag (NSV) is showcasing its first release of the year. **SIDEBOARDS**, created by Hartwig Jakubik and designed by Oliver and Sandra Freudenreich, is a fast card-laying game with high replay value – just what you expect from the NSV titles.

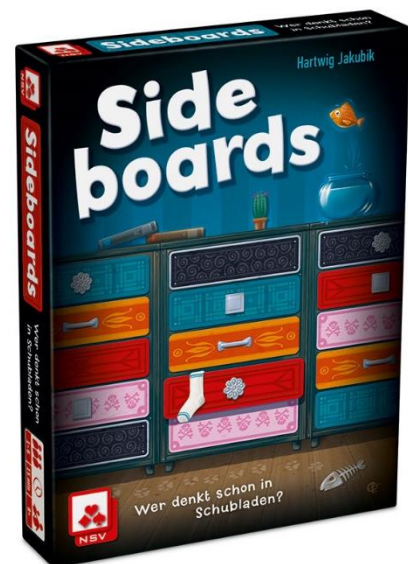

In this game, the goal is to create an eight-card sideboard. The aim is to arrange the cards cleverly to fulfill the displayed tasks in the best way. The player who collects the most points wins the game.

Who puts the smartest sideboard on the table?

The gameplay of **SIDEBOARDS** is easy to understand: choose a card from your hand, place it down, pass cards clockwise, draw a new card. All players perform these steps simultaneously, making the game dynamic from start to finish. After everyone has placed their eighth card, it's time for the final scoring.

Each sideboard card has five drawers in different colors and three differently shaped handles. For fulfilling the three tasks on display, the right combination of these elements is crucial.

In the first task, the color combination, you earn points if the drawers of a color are arranged in the given pattern. The second task, the handle combination, also requires matching patterns, but it's focused on the position of the handles. The third way to score is the row combination. Depending on the task, you try to create the longest straight color or handle row within the sideboard. The longer it is, the more chances you have on the possibly crucial bonus points at the end of the game.

Duel of the drawers for up to 6 people

SIDEBOARDS offers a diverse and enjoyable experience for both casual and experienced players. The combination of the draft and set collection mechanism is easy to grasp but demands tactical skill and overview during the game. With 60 sideboard cards and 30 different task cards in total, no game is the same as the previous one.

Additionally, **SIDEBOARDS** features a solo mode, allowing players to take on the challenge and chase their personal high score anytime.

The game is suitable for one to six players aged eight and above, with a playing time of approximately 15 minutes. It will be available as a German version with an MSRP of 11.40 Euros and will be released in stores in Spring 2024. Instructions in additional languages, as always, will be available on the website of the Nürnberger-Spielkarten-Verlag.
